SunCedar Energy

Solar and battery systems for Lebanese homes and small businesses · Company profile, 2026

Who we are

SunCedar Energy is a solar and battery installer founded in Beirut in 2023. Our showroom and office are in Mar Mikhael, Beirut. We design, install and maintain complete solar systems, so a household or a small business can stop relying on the neighbourhood generator subscription. Our team speaks Arabic, English and French.

Mission

To give every Lebanese home and small business reliable, clean electricity without depending on the neighbourhood generator, at a fixed price people can understand before they commit.

Home packages

Every home package includes solar panels, a hybrid inverter, a lithium battery, mounting, installation, and the free SunCedar Monitor app. Prices are in US dollars, installed.

Package	System	Typical loads it covers	Price (installed)
Starter	3 kW panels · 5 kWh battery	Lights, fridge, router, TV, phone charging	from $2,900
Family	5 kW panels · 10 kWh battery	Starter loads plus a washing machine and a water pump	from $4,800
Comfort	8 kW panels · 15 kWh battery	Family loads plus one inverter air conditioner and an electric water heater	from $7,400

Not included in package prices: structural work on the roof, and cable runs longer than 30 metres between the roof and the inverter. These are quoted separately after a site visit.

Other services

Service	What it is	Price
Business Solar	Systems from 10 to 60 kW for cafés, workshops, shops and offices. Designed after a free site survey.	Custom quote
Generator-to-Solar Audit	We review your generator bills and daily loads and recommend a package. 45-minute video call, or an on-site visit.	Free online · $40 on site (deducted from any installation)
CedarCare maintenance	Two panel cleanings a year, inverter health checks, priority repair within 48 hours.	$12 / month or $120 / year
SunCedar Monitor app	Live solar production, battery level and fault alerts on your phone. 24/7 remote monitoring by our team.	Free with every installation

Installation, payment and warranty

Timeline. Home packages are installed within 7 days of the deposit, usually in a single working day. Business systems are scheduled after the site survey.

Payment. USD cash, bank transfer, or card. Starter and Family packages can also be paid with our in-house plan: 30% down, and the remaining 70% over 12 months at 0% interest.

Component	Warranty
Solar panels	25-year performance warranty
Hybrid inverter	5 years
Lithium battery	6 years or 6,000 cycles, whichever comes first
Workmanship (installation)	2 years

Where we work

We currently serve Greater Beirut, Mount Lebanon (Metn, Keserwan, Baabda, Aley and Chouf), Jbeil/Byblos and Batroun. We do not yet serve the South, the Bekaa, or the North beyond Batroun. Customers in those areas can join our waitlist.

Our team

Name	Role	Background
Rami Haddad	Co-founder & CEO	Electrical engineer. Eight years designing power systems for a Beirut contracting firm before founding SunCedar.
Lea Mansour	Co-founder & CTO	Computer engineer. Built the SunCedar Monitor platform that watches every installed system around the clock.
Karim Saab	Co-founder & Head of Installations	Certified solar installer with 12 years in the field. Leads our crew of 14 certified technicians.

What makes us different

> **“Generator-free in 7 days, or your first year of CedarCare is free.”**

- **Published fixed prices** for every home package, so there is no haggling and no surprise quote.
- **24/7 monitoring** of every system we install, with alerts before small faults become outages.
- **A local team** that answers in Arabic, English or French, and repairs within 48 hours on CedarCare.
